February 13th, 2022

Dear Hiring Manager:

I am excited that you decided to open my cover letter. I would treasure the opportunity to work with you as I have a strong passion for software development. The skills and abilities I gained at Seneca College would be a great addition to your company. I have maintained a very strong GPA, as I am comfortable learning and working with new technologies.

As I begin my 4th semester in the Computer Programming & Analysis program, it is my 3rd semester developing websites with JavaScript, HTML, CSS, and I am currently learning about Angular and React. I have done 2 semesters using Oracle SQL Developer and MongoDB (NoSQL) where I got familiar with queries and database coding. Java is also being taught this semester as an upgrade to my C++ programming knowledge. My current job helped me manage and prioritize workloads to meet deadlines, by offloading trucks and entering the goods into a database, to help other teams operate successfully.

I am a dedicated employee who is always committed, and I would bring the same attribute to your office to be an effective team member. I look forward to meeting you to discuss how I can meet your objectives by applying my skills, training, and positivity. Please contact me through my WIL Coordinator at Seneca College. Thank you for your time and consideration.

Sincerely,

Balazs Sztojkovics
