Aug 18th, 2022

Dear Manager:

I am excited that you have an open co-op position available at your company. The skills and abilities I gained at Seneca College would be a great addition to your company. I have maintained a very strong GPA, as I am a quick learner of IT technical concepts and willing to assimilate new information effectively.

As a 5th semester student in the Computer Programming & Analysis program I'm currently in a coop placement developing websites with React. At school I have done 2 semesters using Oracle SQL Developer and MongoDB (NoSQL) and 1 semester of IBM i where I got familiar with queries and database coding. I have gained additional experience using Java, C++ and C. I am also experienced with running various development, testing, and deployment techniques.

I am a dedicated employee who is always committed, and I would bring the same attribute to your office to be an effective team member. I look forward to meeting you to discuss how I can meet your objectives by applying my skills, training, and positivity. Please contact me through email or the above phone number. Thank you for your time and consideration.

Sincerely,
Balazs Sztojkovics
